

Explanatory notes to the financial statement of Herti JSC

For the period 01.01-31.03.2025

1. Important events, that took place in the period 01/01 – 31/03/2025

The first quarter of 2025 was better compared to the same period of the previous year, despite expectations of a continued decline in consumption trends. Sales increased by 15% compared to 2024. Both gross and net profit from operations improved. New projects with clients were also initiated. Overall, the situation is positive for Herti, although there is some uncertainty related to the imposition of tariffs in the USA and the associated risks of reduced orders. Interest expenses on loans were nearly halved. Efforts continue to improve organizational structure and optimize costs. Significant progress is being made in the construction of the new production facility and related infrastructure.

At the end of January, Herti participated, as is tradition, in the largest wine and winemaking exhibition in the USA – the **Unified Symposium** in Sacramento, where the company presented its extensive range of products.

On February 27, 2025, a meeting of the Board of Directors was held, at which the individual audited financial statement for 2024 was approved. The Board resolved to convene the regular General Meeting of Shareholders on June 24, 2025, and approved the agenda. A decision was also made to extend the term of the bank guarantee and overdraft agreement with UniCredit Bulbank by 12 months.

The leading trade fair for wine and spirits, **ProWein**, was held from March 16 to 18 in Düsseldorf, Germany. In addition to the exhibition stands, the event featured numerous activities such as tastings, seminars, and workshops, offering visitors insights into trends and developments in the industry. ProWein provides Herti with an ideal platform to showcase its innovative products and solutions to an international audience. The company's aluminum screw caps are distinguished by their design and functionality and help preserve the quality and freshness of bottled products.

In March, Herti also participated in a conference on olive oil and edible oils in the USA.

On April 9, 2025, the closing event for the 2014–2021 Norwegian Financial Mechanism programming period was held at Hilton Hotel Sofia, under the program “Business Development, Innovation and SMEs in Bulgaria.” The event, attended by deputy ministers, was organized by the Norwegian Financial Mechanism, in which Herti took part.

On April 10, 2025, Herti participated in the **Career Fair** organized by the Municipality of Shumen, aimed at early career orientation. Vocational schools and businesses in the region were represented at the fair.

2. Risk reduction and financial instruments

The functional currency of the company is the Bulgarian lev. Most of the transactions conducted on the international market are carried out in euros. This minimizes currency risk. The agreed terms with customers and suppliers as of the date of preparation of this report allow the company to avoid using financial instruments such as hedging.

Since the beginning of 2024, all aluminum suppliers have adjusted their prices downward, which has resulted in a decrease in direct production costs. Herti has also taken steps to reduce

the selling prices to its customers. At the end of 2024, there was a trend of slight increases in the prices of key materials, which affected the fourth quarter of 2024. The observed improvement in the supply chain during 2024, which in turn improved the planning and forecasting of raw material and material deliveries, was hindered by the onset of military conflict in the Middle East. This led to disruptions in the supply chain, which increased the cost of sea transport. Currently, deliveries are regular, but delivery times have nearly doubled. All of this contributes to an increase in production costs. Due to Herti AD's good liquidity, the company is able to maintain larger inventories of raw materials and supplies, thus preventing disruptions to the production process and ensuring Herti AD can fulfill customer orders as usual.

Management monitors the situation on a daily basis and has identified certain stabilization measures. Through the implementation of these measures, the company expects the negative financial consequences to be mitigated.

3. Information on the transactions between the Company and related parties

For the period 01.01- 31.12.2024, the Company has realized the following transactions with related parties:

Related party	Transaction	Amount (in thousand BGN)
Herti Group International	Sales of product	867
